

CITY OF CERRITOS

Your business may be eligible for a 5 percent discount on electricity costs.

The City of Cerritos operates Cerritos Electric Utility (CEU), an electric utility that provides clean, reliable and lower-cost electricity to businesses in the City. There is no charge to switch your electricity service from Southern California Edison (SCE) to CEU.

Your business will continue to be eligible for any of SCE's energy rebate and incentive programs, even if you switch. CEU will provide your energy, while SCE will continue to transmit the electricity to your business.

For more information and to request a free analysis of your potential energy cost savings, visit the Cerritos Web site at cerritos.us and click on the **Electricity Costs Discount** link under Featured Links.

CEU staff will contact you to arrange for a free analysis of your electricity costs. For more information, contact the City at **(562) 916-1219** or via e-mail at cerritospower@cerritos.us. Make the switch to Cerritos Electric Utility and start saving 5 percent on your electricity costs.
